# Outside

OBJECTS

2005

Naoto Fukasawa

## Description

---

An egg with its container, a solid and a hollow part, the convexity and concavity of a hold-all container. In an elegant glossy lacquer finish, available in black or white, Fukasawa presents his personal and humorous interpretation of the classic oriental theme of opposites, positive and negative, yin and yang. The container Outside, a six-faced box with a cavity shaped like half an egg carved out of one side, is the perfect bowl or fruit basket, with a purpose that can change according to the need of the moment.

## Technical information

---
