
Nooch

ARMCHAIRS

2023

Piero Lissoni

Description

After the great success of Borea, Piero Lissoni and B&B Italia continue to pursue research and sustainability in the outdoor sector, creating Nooch, a modular seating system whose name is inspired by the tropical botanical garden of Nong Nooch in Thailand. The armchair's key feature is the tubular structure in recycled aluminium, a light and strong material, completely recyclable. A choice inspired by simplicity, which recalls elementary tubular structures and ennobles them with a design that pays attention to every detail. The intersection of the structural elements represents the iconic feature of this collection, with the particular elbow curve achieved by the way the aluminium bends. A design and engineering detail that combines function and beauty. The paddings are designed with sustainability in mind. They use regenerated materials, which are completely separable, and consist of two layers of polyurethane with different densities and firmness: one layer made of polyurethane recycled from production waste and one made of virgin bio-polyurethane, both wrapped in an outer sheath of recycled PET.

Technical information

Frame

die-cast aluminium and extrusions

Back and seat upholstery

shaped polyurethane, biodegradable polyester fibre recycled from PET, cover in water repellent polyester fibre

Cushion upholstery (NH60_60C)

biodegradable polyester fibre recycled from PET, cover in water repellent polyester fibre

Spacers

plastic material

Ferrules

thermoplastic elastomer

Waterproof cover cloth

PES fabric coated on one side in PU

Cover

fabric in limited categories

Technical drawings
