

Hollow

SOFAS

2006

Patricia Urquiola

Description

This project is the result of a group of modular panels of different sizes, which can be assembled through hinges to act as back and armrest and hold a soft seats. Blocked and supported by the legs, the entirely upholstered and lined panels display a concave plastic surface on the outside, which visually moves the elements and enhances their effect of lightness. The types originated from this system include a small two-seater sofa in two different sizes and a small three-seater sofa in two different sizes.

Technical information

Internal frame

tubular steel and steel profiles

Internal frame upholstery

Bayfit® flexible cold shaped polyurethane foam, polyester fibre cover

Shell

plastic material or plastic material and leather

Feet and joints

steel

Ferrules

thermoplastic material

Cover

fabric or leather in limited categories
